Foreword

Dear Friends,

I hope you are doing well.

We continued the momentum from Q1 '22 by kicking off a series of community outreach events in the holy month of Ramadan, culminating in the Aidilfitri celebrations with the underserved communities. We continue to engage our fellow employees in our CSR journey with diverse and colorful programs, such as planting mangrove tree saplings, growing 'pak choys' at home to be donated to NGOs, painting batiks to decorate schools, and tie-dyeing T-shirts to help NGOs raise funds. Intel volunteers have clocked more than 30,000 hours in the first half of 2022, and through our employees' passion and commitment to the community, we hope to meet our target of 50,000 volunteer hours for 2022.

This quarter, Intel was recognized by the Malaysian government for our contributions to the country. The next big event we're very much looking forward to of course is our Intel Malaysia 50th anniversary celebration, happening in August 2022. To all my fellow Muslims, I would like to wish you Selamat Hari Raya Aidil Adha.

Amran Mohd Dom
Public Affairs Director,
Intel Malaysia

In the Spotlight

Celebrating 50 Years of E&E

We were one of the companies recognized for our contribution to Malaysia's electrical and electronics (E&E) industry at the Malaysian Semiconductor Industry Association gala dinner, held on 30 May to celebrate the 50th anniversary of the country's E&E ecosystem.

AK Chong, Vice President of Manufacturing, Supply Chain & Operations/Managing Director for Intel Malaysia site, accepted the award from the Senior Minister for Trade and Industry, YB Dato' Seri Mohamed Azmin Ali.

Congratulations

Debugging for the Future

Dr. Angie Ng, from Intel's Internet of Things Group, was a featured speaker in InvestPenang's '50 Years of Excellence and Beyond' webinar on 23 May. She shared essential insights into the workings of Cloud-based Remote Debugging (CBRD), the remote debugging tool her team designed to resolve customer issues, from anywhere in the world.

Angie then shared how her team leveraged on the CBRD to develop the System Cloud for University, an initiative enabling students to virtually access simulated engineering instruments and laboratory setups. This platform was launched in April 2021.

Overview of SC4U

Common infrastructure	Secure authentication	Remote Debug features	Scalable board farm

Community Outreach

Mangrove Tree Planting Program 2022

75 Intel Malaysia volunteers rallied to plant 500 mangrove tree saplings at Sungai Acheh (Nibong Tebal, Penang) during the Intel Malaysia Mangrove Tree Planting program, which was organized by MY PA in collaboration with the Penang Inshore Fishermen Welfare Association to increase biodiversity through supporting mangrove restoration.

Hari Raya Festive Cheers 2022

It was a joy to help spread cheer among 30 underserved recipients once again at the Penang Social Welfare Department in Balik Pulau, Penang. The recipients took home goodie bags containing daily necessities via the annual Intel Malaysia Hari Raya Festive Cheers program.

As part of the Hari Raya celebrations, 78 children from the BEDAYA and Rumah Anak-Anak Yatim Bekas Perajurit orphanages in Kulim received their brand-new traditional attire from Intel Malaysia to match this colorful occasion.

One Community Day: Cerebral Palsy (Spastic) Children's Association

The recent One Community Day (a CSR event) was met with great enthusiasm by our employees, after two years of physical absence due to pandemic restrictions. 40 Intel Malaysia volunteers helped accomplish key tasks at the Cerebral Palsy (Spastic) Children's Association of Penang.

Over two separate visits, our volunteers baked buns, assembled new furniture, cleaned and repaired wheelchairs, and carried out general housekeeping duties.

One Community Day: St. Nicholas' Home

63 Intel Malaysia employees volunteered for the One Community Day initiative at St. Nicholas' Home in Penang. The event was spread across two days of spring cleaning and fulfilling general housekeeping tasks at the Home.

Our volunteers also learned priceless lessons from attending an educational talk titled 'Life of a Visually Impaired Person' and participating in onsite activities conducted by the Home's instructors. We thank the Home for allowing us to be a part of their community.

### Grow, Harvest & Donate - Home Hydroponic Program

It was a successful hydroponics harvest for our Intel Malaysia volunteers, whose harvesting period for their vegetables ('pak choy') was spread out over different dates. The vegetables were donated to Seri Cahaya Welfare Home, Silver Jubilee Home for the Aged, The Cerebral Palsy (Spastic) Children's Association, Eden Handicap, Penang Cheshire Home and several NGOs in Kulim, Kedah.

Tie & Dye Program

This year's Tie & Dye program saw 337 volunteer sign-ups. This gave families a wonderful opportunity to work together on a fun and exciting activity! Intel Malaysia collaborated with Asia Community Service (ACS) to collect and sell the completed tie-dye shirts on ACS' online platform to raise funds. 45 Intel Malaysia employees opted to buy their own tie-dye T-shirts, for a good cause, directly from ACS.

Batik Painting Program

Launched in the last week of April, the Batik Painting program presented 380 Intel Malaysia volunteers an opportunity to put their artistic skills to the test. The result was an outpouring of beautiful and creative batik art. All paintings will be donated to schools and NGOs to be used in the decoration of classrooms, hallways, learning centers and teachers' rooms.
